

FOR IMMEDIATE RELEASE

March 30, 2010

## **Pdc Machines helps promote green energy, green jobs, green planet.**

Pacesetting diaphragm compressor manufacturer will be in attendance at the 2010 National Hydrogen Association (NHA) Hydrogen Conference & Expo in Long Beach, CA.

Warminster, PA March 30, 2010 – Pdc Machines Inc. (Pdc) congratulates the National Hydrogen Association (NHA) as it marks its 21<sup>st</sup> annual conference with the theme, “Green energy, green jobs, green planet”.

Pdc will be showcasing its product line at the NHA Hydrogen Conference and Expo, May 3 - 6, at the Long Beach Convention Center. For more than 30 years Pdc has supplied gas handling and compression systems to the industrial gas and chemical industries. But over the past 10 years, the company has evolved to become the leading equipment packager and integration provider for hydrogen refueling stations, with more than 80 installations completed to date.

"Only recently have we come to realize that we were 'green' before 'green' was defined", says Osama Al-Qasem, Sales and Marketing Director for Pdc. "And we continue to provide innovative solutions to our customers world wide as they strive to promote the successful development and widespread adoption of alternative fuels, with a particular emphasis on the use of hydrogen."

Pdc provides an extensive line of diaphragm compressors with a broad assortment of options. From basic units to fully automated PLC controlled compression systems, Pdc can meet the pressure and purity requirements that you prescribe. Pdc also offers a wide range of models for compressing and re-cycling hydrogen and nearly every other industrial gas or gas mixture.

In addition to providing expertise and solutions in alternative and renewable energy, Pdc also packages skid mounted and bench scale pilot plant systems. From providing the simplest lab set to the most complex process system, Pdc staff has the talent and experience required to address your needs in polymer, specialty chemical and process gas handling operations.

Attendees of the upcoming Hydrogen Expo are encouraged to visit Pdc at booth #211 to learn more about our product line and to discuss the ways in which our capabilities can help to enable your success.
